## THE SECOND TRANSNATIONAL MEETING

The second transnational meeting was held on December 2nd 2023 in the city of Bonn in Germany. The meeting was organized by Erasmus ME Academy, partner of the project. AESCAS informed the partners that the National Agency has approved a project extension, so the total duration now spans 30 months, instead of 24, and it will finish in March 2025

## WHAT WAS DONE..

During the meeting the partners discussed the following topics.

Regarding the WP2 - EQUAL SciTech Approach Guide, the leading partner shared the results of the survey carried out by the single partners. The next step will be to report the integrated results in the EQUAL SciTech Approach Guide, that will be later translated in the partners' languages.

*Project Meeting in Bonn*

## THE NEXT STEPS...

As for the WP3 the scheduled activities are the following:

- Co-operative creation of a card game (8 cards per partner; each card will bear an in-depth study of prominent women in STEM). YES will provide a template for the cards. Professionals from each partner country will take part in 2 pilot sessions meant to test the game.
- The card game will be complemented by instructions, an interactive digital book and the creation of a Video Festival devoted to inspirational topic-related movies.
- The pilot sessions (once we have the cards done) will involve
  - 20 teachers + 60 students for AESCAS
  - 15 teachers + 60 students for IIS FORTUNATO
  - 15 teachers + 60 students for SOU Pero Nakov

With regard to the implementation of WP4 , the partners have devised the creation of the EQUAL SciTech platform. The platform is meant to be an extension of the website. Erasmus ME Academy will provide a template for the platform to be shared among partners. The guide will be an integral part of the platform. The link to the platform will be shown on the website.
